The Modular Home

Are there inventive ways to make our #workingfromhome office more MODULAR and efficient?

Tejo Remy

During these unprecedented times caused by the outbreak of the COVID-19 we find most of our population working from home. Not only this, we need to eat, sleep, relax, work out in the same environment. This can be a very tough situation especially looking at people in small / shared housing or families trying to care for another whilst working. So how do we make our homes or rooms more adaptive to combine our workstation with all the rest of our needs? Are there inventive ways to make our #workingfromhome office more MODULAR and efficient?

We want to ask you for your creative inventions and see how easy, hands- on, low key design ideas can come into play and reverse your kitchen into an office, or your bedroom into a yoga studio ?

The Modular Home

Lensvelt

to get you going :

1. Look around you! Where do you work? And how do you cook, eat, sleep, relax, babysit around it?

2. Is there one space where you can sit, lie down, stand and do exercise?

3. What could you possibly use or combine to create multiple uses out of one object or room?

4. How can you create more space in a small environment?

5. Would you design / create something from scratch to improve your work station?

THIS CAN BE BETTER...

We don't want to give away too many ideas;
we want to hear YOUR creativity and how
you can make your home more MODULAR.
Here are some tips to get you going....
stacking

leaning up

wrapping
cutting

tape

folding

The Modular Home

* For the more advanced creators, think of adding hinges, bolts, wooden tops/covers, wheels, pulley systems, ropes, etc.

* Without having to go to your local DIY: RECYCLE YOUR WASTE! What can you do with all that wasted toiletpaper roll? What to do with your ripped Sainsbury's bag? Think outside the (instagram) box!

EFFICIENT
UGLY
BIG
SMALL

AS YOU LIKE

Taping up a chair with foam to make it more like an office chair?

Turning your double bed upright to create a new standing desk?

suspending hammocks or swings as a way of relaxed working?

Creating new fold out seating areas to maximise space?

Designing a multi functional light for day & night?

All you need to do is design your best modular furniture / object / space to improve your *working-from-home* set up.

Share it with us using the hashtag #DesignYourModularHome and we will share it with our audience.

Be as creative and the results are endless. From illustrations to video's, animations to final products, sketches to CAD drawings, photographs to prototypes, all is wellcome.

The Modular Home

WHY?

All we want is finding positive ideas to generate new inventions in our current, highly impacted daily lives caused by the outbreak of COVID-19.
